

Dream Program is an annual training camp hosted by PyeongChang 2018 Legacy Foundation to nurture young winter sports talents from snowless countries or where winter sports are not widely practised. Being launched in 2004 and celebrated its 19th program in 2023, Dream Program has invited 2,528 young people from 97 different countries to participate in winter sports training, along with various cultural experiences. Among them, we are proud to announce that over 150 athletes have competed in international winter sports competitions.

The international sports communities, including the IOC, have recognized the contribution of the Dream Program to the shared growth of global winter sports and the promotion of friendship through sports, which led PyeongChang Legacy 2018 Foundation to realize its dream to host the Olympic and Paralympic Winter Games in PyeongChang.

Attending the Dream Program allows the athletes to connect with other talented athletes from different parts of the country or even internationally. This networking can lead to future collaborations, partnerships, and exposure to new training techniques and strategies.

The Dream Program offers a unique and valuable experience for young athletes and their coach, providing them with the tools and resources to pursue their dreams and reach their full potential in their respective sports.

In this regard our 02 young athletes and 01 senior coach are directed to attend the Training Camp with the hope to attend more advanced training and being a steppingstone for these promising youths to pursue their dreams as winter sports athletes.
